***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest, *inter alia*, a fluorescent-light image obtaining apparatus comprising excitation light emitting means for projecting excitation light onto a target tissue, and illuminating light emitting means for projecting illuminating light onto the target tissue, and fluorescent-light image obtaining means for obtaining a fluorescent-light image formed of the fluorescent-light emitted from the target tissue upon irradiation thereof by the excitation light, and a normal-image obtaining means for obtaining a normal-image formed of the illuminating light reflected from the target tissue upon irradiation thereof by the illuminating light, further comprising a contact detecting means for detecting that the distal end of excitation light emitting means has come into contact with the target tissue, and an excitation light emission controlling means for controlling, in response to the detection signal of said contact detecting means, the output of the excitation light emitted from the excitation light emitting means.

Concerning the section 103(a) rejection using Hattori, the examiner agrees with applicant in that the cited reference does not teach or suggest an apparatus for imaging tissue having a contact detecting means for detecting that the distal end of excitation light emitting means has come into contact with the target tissue, and a distance parameter detecting means for detecting a parameter correlating the distance between the distal end of excitation light emitting means and the target tissue as described in claims 1 and 5. Based on the above observations, claims 1-17 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
